## OpenCore Configurator: [Neues Projekt]

Beitrag von „Raptortosh“ vom 1. März 2021, 18:42

Hier ein Update:

### OpenCore 0.6.7 supported

- Removed deprecated KeyMergeThreshold key in UEFI -> Input properties [available only for OC 0.6.7 development version]
- Added GopPassThrough key in UEFI -> Output properties [available only for OC 0.6.7 development version]
- Added SystemSerialNumber key in PlatformInfo -> PlatformNVRAM properties [available only for OC 0.6.7 development version]
- Added new EFI Maker tool in Tools menu
- Updated PlatformInfo section:
  - now works even when you're not connected to the internet
  - now check if your firmware data needs an update
  - added option to update firmware only
- Updated Tools and Drivers downloader
- Updated PickerVariant element for custom input data in Misc -> Boot section
- Fixes and improvements
