

Clover / OpenCore EFI für HP Probook 430 G5

Beitrag von „D1Golden“ vom 6. März 2021, 07:11

Good afternoon friends! please tell me I downloaded the opencore build from the post above. I downloaded the image 11.1 specifically as in the video. via open core, the CPU is defined as i7 and bluetooth does not work correctly.. wifi in general does not see.. [griven](#) Could you help me? for the first time I put hackintosh..
