

Dell Latitude 5490 Kernel Panic

Beitrag von „sebus“ vom 13. März 2021, 09:19

OK.

Swapped NVMe from original

Dell Micron 2200 256Gb (MTFDHBA256TCK, Dell PN 0CH8J1)

to

Silicon Power 256GB NVMe M.2 PCIe Gen3x4 2280 TLC SSD Model A80 SU256GBP34A80M28AB

and it booted to recovery USB fine. Catalina 10.15.7 also boots fine

Micron is only trouble - as per [this](#)
