

# Mac OS Monterey - Probleme nach der Aktualisierung

Beitrag von „JN25“ vom 3. April 2021, 14:15

Da steht halt das es dann zeigt was für AMD Grafikkarten installiert sind

```
AMDVBFLASH version 3.04+EXTERNAL, Copyright (c) 2019 Advanced Micro Devices, Inc.

--- amdvbflash v3.04+EXTERNAL ---
-h, -?, /h, /?          Help (this screen)

Format: amdvbflash [command] [parameter1] [parameter2] [parameter3] <option/s>
[command]:
-i [Num]                Display information of AMD adapters in the system.
                       Display information of adapter [Num] if specified.
-ai [Num]              Display advanced information of AMD adapters on system.
                       Display advanced information of adapter [Num]
                       if specified.
-biosfileinfo <File>  Displays the Bios info in file <file>
-p <Num> <File>       Write BIOS image in file <File> to flash ROM in Adapter
                       <Num>.
-pa [-padevid=] <File> Write BIOS image <File> to all appropriate adapters.
                       Use with -padevid or -passid or -pasvid or -pavbpn or -fp.
                       Command example:
                       command = -pa -padevid=0xXXXX a123.bin
-s <Num> <File> [Size] Save BIOS image from adapter <Num> to file <File>.
                       First [Size] kbytes (except for Theater in bytes) of ROM
                       content is saved if [Size] is specified.
-cf <File> [Sum]      Calculate 16-bit checksum for file <File>.
                       Checksum for the file is compared to [Sum] which is
                       the expected checksum
-cb <Num> [Sum]       Calculate 16-bit BIOS image checksum for adapter <Num>.
                       Checksum for the BIOS image is compared to [Sum] which is
                       the expected checksum
