

# [ungelöst] DSDT: Suche Battery-Patch für HP Envy 13-ab0xx

Beitrag von „roopie61“ vom 6. April 2021, 03:16

The screenshot shows a forum post interface. On the left, there is a list of HP Envy laptop models under the heading "HP Envy". The models listed include: Gigabyte u2442N/..., HP DM4t-1000, HP DV2-2500, HP DV6-3165sf, HP DV6t-6b00, HP DV7-6xxx, HP DV7-7xxx/DV6..., HP DV7-1120, HP Elite X2, HP Envy 4, HP Envy 14, HP Envy 17t, HP Envy DV6, HP Envy M4, HP Folio 13 1010es, HP G6 2221ss, HP G6 B13SL, and HP Pavilion n012tx. The main content area displays a code snippet for a battery patch, titled "#Maintained by: RehabMan for: Laptop Patches #battery\_HP-Envy-14.txt". The code includes comments about its creation and compatibility with HP Envy 14-2166se and HP Envy 14-2050SE. It defines a method "label B1B2 remove\_entry;" and shows a diff between "Before" and "After" states. The "After" state shows a method definition: "Method (B1B2, 2, NotSerialize...)" with a body containing "Return ((Arg0 | (Arg1...))". At the bottom of the code editor, there are buttons for "Open", "Apply", and "Close", along with a status bar indicating "123 Patches, 6 Changes, 0 Rejects".

HP Envy 13 sehe ich da nicht

```
#Maintained by: RehabMan for: Laptop Patches
#battery_HP-Envy-14.txt

# created by RehabMan 2013-11-07
# for ddoryoo

# works for:
# HP Envy 14-2166se
# HP Envy 14-2050SE

into method label B1B2 remove_entry;
into definition block code remove_entry insert

Before                                     After
Method (B1B2, 2, NotSerialize...
{
    Return ((Arg0 | (Arg1...
})

Method (B1B2, 2, NotSeria...
```
