

BS 11.2.3 -> 11.3 sind erschienen (20E232)

Beitrag von „Harper Lewis“ vom 27. April 2021, 17:28

Zitat

XhciPortLimit

Note: This option should be avoided whenever possible. USB port limit is imposed by the amount of used bits in locationID format and there is no possible way to workaround this without heavy OS modification. The only valid solution is to limit the amount of used ports to 15 (discarding some). More details can be found on AppleLife.ru.

Anleitungen liest sich aber eh niemand durch, so wie es aussieht.
