You do not need to specify revcpu = 1 on AMD. It is enabled by default. Enjoy =)

UPD: That may have been broken before
<https://github.com/acidanthera...398856e55e72dffe0e0d84c5c> .

Hello vit. Is there anything that would stop this working for AMD? I'm still stuck with Unknown showing as the CPU. Happy to upload any debug info that's required.
