[Shanee](#), [Roy Jones](#) please file a bug in <https://github.com/acidanthera/bugtracker/issues>. Make sure to use the latest versions (we had a release today). Include hardware info & a DEBUG log by using DEBUG Lilu and RestrictEvents with `-liludbgall liludump=60` boot arguments. The debug log will be put to `/var/log/Lilu_x.x.x.txt` file 60 seconds after booting. Thanks.
