

HP EliteBook 840 G1 & OpenCore Catalina/Big Sur

Beitrag von „Franck“ vom 10. Mai 2021, 20:38

Hi all,

I'm on a HP 840G1 (i7 + 16 GB) with Catalina and everything is working perfectly (Intel Wifi, Bluetooth, messaging..). I'm now trying to use a docking (HP UltraSlim Dock 2014) with 2 monitors:

- USB is working fine for Mouse and Keyboard.
- the PowerOn button is not working
- 2 screens are not detected.
- I don't know if sound (output and input) is working yet.

Would you share your experience / or EFI ?

Thanks.
