

MOJAVE | Comet Lake i9 10850K | iGPU UHD630 | Z490 | Opencore | iGPU Framebuffer Patching

Beitrag von „EdD1024“ vom 16. Mai 2021, 11:25

Did you actually look up what the guide is saying for your iGPU? Seems quite overloaded and simply wrong what you got there, probably the source was using a different CPU. You need to adjust the config file for your purposes. Then it might click-in.
