Die Käsereibe gibts bald zu kaufen - Hackintosh Case

Beitrag von „apfelnico“ vom 3. Juni 2021, 18:11

Na bitte, nur noch drei Tage Aufschub. 😊

Zitat

On the 24th May 2021, due to extreme weather conditions, there was a power outage in the Guangdong Province, impacting the factory where the Dune Pro is assembled. This power outage lasted for three days, between the 24th and 27th May. Regrettably, we overlooked communicating this information to our backers, as we believed it would not impact our projected shipping date of the 28th May 2021.

Unfortunately, the power outage in the Guangdong Province resulted in a 3 day delay to the shipping process of the first batch of the Dune Pro.

Ach, die sind ja schon rum. Und sonst? Da wird noch gefriemelt:

Zitat

We would like to address another concern our Backers have. We have faced challenges in the Mass Production of the Dice-Y Cover. However, we are working directly with the factory to fine tune the process, allowing the Dice-Y Cover to be effectively produced on a large scale.
