

Erledigt

WLAN Verbindung funktioniert nicht

Beitrag von „GevatterBaer“ vom 27. Juni 2013, 07:25

Ich habe den Kext aus dem Link (http://www.osx86.net/view/3913...o80211_family_ar9285.html) installiert und den String eingetragen - dann lief es 😊

Jetzt ist es jedoch so, dass der Computer sich nicht automatisch mit dem WLAN verbindet - ich muss es immer erst in dem Fenster (das immerhin automatisch erscheint) anklicken. Ich habe das hier im system.log gefunden:

Code

Alles anzeigen

Sagt einem das etwas? Anscheinend klappt der Auto Join nicht.

Edit: Habe das Netzwerk noch mal gelöscht, neu gestartet und neu verbunden - jetzt klappt es.
