Hello, I used a PCI-E NVME M.2 adapter card, and I installed a LexarNM620 1TB M.2 NVMe SSD, installed in PCI-E Slot 2, which can be used normally in Windows systems, but Apple systems cannot start , Will automatically restart when you see the Apple icon and the progress bar is about 3% when starting the system. I guess it is necessary to make another aml file for NVME? Please help me 😊
