3x RX 6900 XT, 64 Nodes: 65 fps

3x RX 6900 XT, 6 Nodes THN: 35 fps

2x RX 6900 XT, 64 Nodes: 55 fps max

2x RX 6900 XT, 6 Nodes THN: 29 fps

1x RX 6900 XT, 64 Nodes: 31 fps max

1x RX 6900 XT, 6 Nodes THN: 27 fps

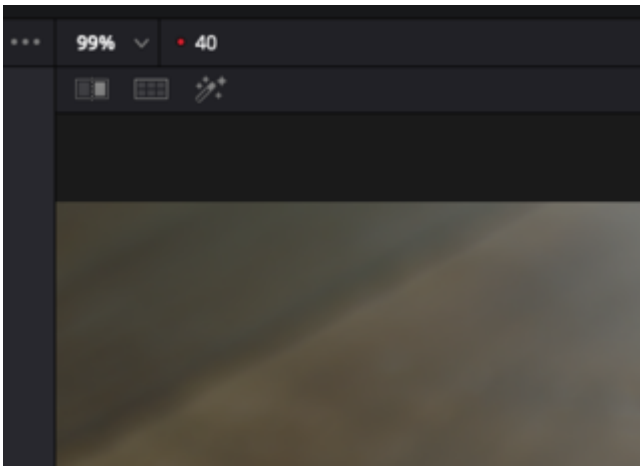

So that's not linear but i think for other Davinci related reasons.

Another nice test is a speed change to 25% with Retime Process set to Optical Flow and Motion Estimation set to Speed Warp. 😊

1x RX6900Xt

6 TRN nodes:

66 Blur nodes:

If you have some project to test for retime process set to optical flow I will like to tst it 😊

Thank you
