

# Frage zu Festplattenspeicher freiräumen

Beitrag von „TheSnooze“ vom 21. Juli 2021, 19:06

Dass sieht dann so aus...

A screenshot of a macOS terminal window. The title bar shows 'hal9000 — -bash — 80x24'. The terminal output shows the user logging in on Wednesday, July 21, 2021, at 18:28:40. They attempt to change to the directory '/largefiles', but receive an error: '-bash: cd: /largefiles: No such file or directory'. Then, they run the 'ls' command, which lists the following directories: Applications, Creative Cloud Files, Desktop, Documents, Downloads, Dropbox, Library, Movies, Music, Pictures, Projects, and Public. At the bottom, there is a line: 'wahrmarhtriyoqyro@awdrt.com Creative Cloud Files' and the prompt 'HALs-iMac-Pro:~ hal9000\$' with a cursor.

```
hal9000 — -bash — 80x24
Last login: Wed Jul 21 18:28:40 on ttys000
[HALs-iMac-Pro:~ hal9000$ cd /largefiles
-bash: cd: /largefiles: No such file or directory
[HALs-iMac-Pro:~ hal9000$ ls
Applications
Creative Cloud Files
