

Kleiner leiser Tower

Beitrag von „LocalCrack“ vom 12. August 2021, 12:05

I have changed os to High Sierra form Big Sur

I am using bios form following link <https://www.win-raid.com/t5547...ios-UEFI-v-full-mods.html>

I already installed windows 10 on NVME and it works fine.

If you have any latest bios then please send it to me.

I make all changes that you have suggested. little more installed at this time approx. 40% then it stopped.

Please check attached log and Config
