

Kleiner leiser Tower

Beitrag von „apfel-baum“ vom 12. August 2021, 12:37

hello [LocalCrack](#) ,

i am sure you are able to use your pc, the current and latest bios is the build you can get [from asus](#) or the modded one from winraid with added nvme driver, you are able to update the bios by yourself, using the [ubu](#) even from winraid, so the changes are minimalistic to the current one.

minimal changes in the network drivers, the others are uptodate so far

lg 😊
