

# OC DELL Latitude E6420

Beitrag von „Max“ vom 17. August 2021, 16:55

Hey i think you can get acceleration by installing legacy video patches from the Opencore Legacy Patcher because the had success with an MacBook Pro with Intel Hd 3000. **But you do it at your own Risk, so when you like to try it, please make a backup from your files**

**When it doesn't work you may have to make new install and you lost all your DATA**  
**You do it at your own Risk,**
