TINU - Der einfachste Weg zum USB-Installer

Beitrag von „ITzTravellnTime“ vom 20. August 2021, 16:27

[Zitat von canyonwalker](#)

Link is reporting the Error Code 404, please check;)

It seems to be a problem with url parsing on this website, try the link to the page with all the downloads: <https://github.com/ITzTravellnTime/TINU/releases>

EDIT:

[al6042](#) I have also made an update release, here is the change log:

- Fixed a crash that occurs when the [SIP](#) status isn't fully disabled or fully enabled.
- New lower [SIP](#) Requirements (Now the app just requires the CSR_ALLOW_UNRESTRICTED_FS flag to be disabled to operate without forcing the diagnostics mode).
- Updated links in the menu bar.
