

[Sammelthread] MacOS Monterey 12.x DEV-Beta Erfahrungen

Beitrag von „Arkturus“ vom 20. August 2021, 17:01

Ich habe Monterey auf dem T430 mit dem Patch-HD400-Monterey von [@chriss1111](#) installiert, was tadellos läuft, wenn die framebuffer im Deviceproperties entfernt werden und nur die ig-plattform.id verwendet wird, ohne anderen Schnickschnack. Danke an [MacPeet](#) zum Patch für den Hinweis und [griven](#) für die umfassende Beratung.

Was mir aufgefallen ist, das der Migrationsassistent vom 12.0 reproduzierbar das System zerlegt, nach Übertragung der Daten und dem obligatorischen Reboot endet dieser in KP, jeweils zwei Varianten, erst dieses
