

# RX 6xxx(XT) Thread, Lieferbarkeit, Kompatibilität, Leistung

Beitrag von „fabiosun“ vom 17. September 2021, 14:26

with my rig in signature, I think is not so valuable GeekBench test

I have had also a 3090 reference and in some real test in Davinci Resolve I had a 10% better performance with my reference 6900 xt (cuda vs Metal)

I do not understand some benchmarks and results on the net...maybe Nvidia pay better the reviewers
