

# [Sammelthread] MacOS Monterey 12.x DEV-Beta Erfahrungen

Beitrag von „Krystian\_89“ vom 28. September 2021, 20:34

@cobanramo

[Lenovo m93p](#) latest i5 iMac18,1 in SMBIOS and it is about Monterey Beta 6 just after successful installation I get the message when the Auto Updater turns on. It can't be the WiFi module I was pin it off to installation and boot after install.
