

Sleep funktioniert nicht mehr auf Optiplex 7060 SFF

Beitrag von „hackopti2“ vom 29. September 2021, 06:08

scheint jetzt sehr selten aber doch noch manchmal hängenzubleiben, hier mal die Ausgabe der Serial Console

Code

1. PM response took 518 ms (75142, IMRemoteURLConne)
2. PM response took 522 ms (10022, IMRemoteURLConne)
3. PM response took 527 ms (464, Finder)
4. PM response took 530 ms (564, diagnostics_agen)
