

Fast boot settings in OpenCore

Beitrag von „5T33Z0“ vom 2. Oktober 2021, 11:44

[Macko](#)

Set "SecureBootModel" to Disabled (in written letters)

Enable "DisableLinkedJettison" Quirk

Don't use Olarilla SSDTs. Generate your own using SSDTTime instead or use the samples included in the OpenCore Package as basis.

Your Kernel Quirks are incorrect. Compare them again with the guide to fix them:
<https://dortania.github.io/Ope...plist/skylake.html#kernel>
