

# Fast boot settings in OpenCore

**Beitrag von „GoodBye“ vom 2. Oktober 2021, 14:37**

So, your Mac is booting fine with the Providet EFI, you just want to edit Fast / No Boot Picker Boot ?

try this, but is still with Boot Picker ..... OpenCore 0.7.4 - had integrate your board serial.

Put on USB Stick and Boot from the Stick, Rename the Unzipped Folder to EFI.
