

# Chuwi Corebook X

**Beitrag von „matteolidoni“ vom 6. Oktober 2021, 23:05**

Hello!

I am in a strange situation, I cannot get the WiFi to work. (Corebook 14" i4 8259u)

next loads, but it doesn't work.

Checking with Hackintool my corebook has

realtek 8821CE

( not compatible)

but it should have an intel AC7265

I am wrong?
