

Chuwi Corebook X

Beitrag von „matteolidoni“ vom 6. Oktober 2021, 23:05

Hello!

I am in a strange situation, I cannot get the WiFi to work. (Corebook 14" i4 8259u)

next loads, but it doesn't work.

Checking with Hackintool my corebook has

realtek 8821CE

(not compatible)

but it should have an intel AC7265

I am wrong?
