

MSI Z390 TOMAHAWK - Intel® Core™ i3-9100F Processor - macOS Monterey step by step

Beitrag von „Lucas-38“ vom 7. Oktober 2021, 19:15

Hallo ,

i just join hackintosh-forum.de , for getting help and advice , to let me install and get working macOS Monterey.

Ich trete einfach hackintosh-forum.de bei, um Hilfe und Ratschläge zu erhalten, damit ich macOS Monterey installieren und zum Laufen bringen kann.

My Hardware :

- MSI Z390 TOMAHAWK
- Intel i3 (300 SERIES) 9100F (without internal Graphic GPU). **Coffee Lake** .
- Graphic Card Nvidia GTX 1050 .

I spent 23 days learning how to add KEXT and drivers , this is my EFI , to let EXPERT see if all is ok , to let me start installing macOS Monterey

Bootloader used: **Opencore** .

Thanks for every person here , who will try to help me get this working.

EFI created is here below.
