

OC DELL Latitude E6420

Beitrag von „Luluuuuu18“ vom 8. Oktober 2021, 23:27

Hi !

There's definitely an issue with bridge OS...

I've tried to install Monterey, but the same error occurred and the log showed that BridgeOS couldn't be loaded...

finally i successfully installed monterey on the dell but i installed it with a Real Mac directly on the SSD.

No hardware acceleration so difficult to use everyday...
