

RX 6xxx(XT) Thread, Lieferbarkeit, Kompatibilität, Leistung

Beitrag von „Mork vom Ork“ vom 13. Oktober 2021, 12:15

i have the same BAR behaviour on my ASUS X299 SAGE/10G:

with BAR support enabled in BIOS, i have half the time on bootprocess verbose logs,

than verbose log stops but machine continues bootprocess and i am able to login via RemoteDesktopClient from another maschine.

But on the ASUS no Monitor Output at all.

No matter if corresponding OC values set to "-1" or any other Value.
