

OC DELL Latitude E6420

Beitrag von „Mo-5590“ vom 14. Oktober 2021, 15:20

hi

First it is not a big problem just modify kext on your hardware e6520 i think there is your problem

Second the line

```
softwareupdate --fetch-full-installer --full-installer-version 11.6
```

Is for all who have problems in download macos if you want monterey for example just change the number to 12

It is a great solution for dwnloading a clean and full macos

Good luck and thank you
