

Dell 7740 Precision CM246 Unterstützung

Beitrag von „cobanramo“ vom 17. Oktober 2021, 20:26

ja das ist schon viel besser...

```
AppleACPPlatform -> AppleACPPlatform: AppleOsVariant: (D0160930) (loaded-318)
AppleACPPlatform -> AppleACPPlatform: AppleOsVariant: ACPI Exception: AE_ALREADY_EXISTS
AppleACPPlatform -> AppleACPPlatform: AppleOsVariant: ACPI Exception: AE_ALREADY_EXISTS
AppleACPPlatform -> AppleACPPlatform: AppleOsVariant: (SSDT: XHC) while loading table
AppleACPPlatform -> AppleACPPlatform: AppleOsVariant: (SSDT: XHC) while loading table
AppleACPPlatform -> AppleACPPlatform: AppleOsVariant: (D0160930) (loaded-318)
AppleACPPlatform -> AppleACPPlatform: AppleOsVariant: (D0160930) (loaded-318)
AppleACPPlatform -> AppleACPPlatform: AppleOsVariant: ACPI Error:
AppleACPPlatform -> AppleACPPlatform: AppleOsVariant: ACPI Error:

AppleACPPlatform -> AppleACPPlatform: AppleACPCPU: startSerializedOService: unsigned int, unsigned int-> AppleACPCPU: Proc
```

Siehst du, das kann schon ma nicht in deinem sinne sein oder?

da musst du wirklich ne menge aufräumen dort, weiss gar nicht wie du auf so viele tables kommst.

kannst du mir kurz schildern was den auf dem Laptop so läuft und was alles gar nicht tut? Bildschirm, Lid, Sleep, Helligkeitregelung, Sound, Touchpad? usw..

Ich denke wir können das schon bereinigen und auf einen guten nenner kommen.
