Für Catalina brauchst du die richtigen Werte in der config an diesen Stellen und aus diesem Grund:

```
5. MinDate
Type: plist integer
Fallback: 0
Description: Minimal allowed APFS driver date.

The APFS driver date connects the APFS driver with the calendar release date. Apple ultimately drops support for older macOS releases and APFS drivers from such releases may contain vulnerabilities that can be used to compromise a computer if such drivers are used after support ends. This option permits restricting APFS drivers to current macOS versions.

• 0 — require the default supported release date of APFS in OpenCore. The default release date will increase with time and thus this setting is recommended. Currently set to 2021/04/01.
• -1 — permit any release date to load (strongly discouraged).
• Other — use custom minimal APFS release date, e.g. 20200401 for 2020/04/01. APFS release dates can be found in OpenCore boot log and DkpfLib.

6. MinVersion
