[ITzTravellnTime](#) Even with [SIP](#) enabled?

Yes, i made sure the latest version of TINU works even with [SIP](#) enabled, it will just prompt you to use the diagnostics mode which allows you to bypass the problems that you have with [SIP](#) enabled.

Download the latest TINU here, so you can have the most up to date copy:
<https://github.com/ITzTravellnTime/TINU/releases>
