

Sammelthread für BT Probleme unter Monterey

Beitrag von „5T33Z0“ vom 1. November 2021, 17:25

[swiftoholic](#) Nice, gleich mal testen.

<https://github.com/acidanthera/BrcmPatchRAM/releases>

"v2.6.1

Improved BlueToolFixup compatibility with macOS 12b10

Fixed bluetooth support on MBP15,4 and other similar boards

Fixed bluetooth not working on macOS 12 after the first power cycle"

>> Bluetooth wird innernoch als Dongle erkannt, aber re-aktivieren funktioniert jetzt wieder.

Zitat

[...] After the Bluetooth stack overhaul in macOS 12, we are still trying to get things in line. [...] BlueToolFixup makes most devices work on any Mac model with on-off support. Please note that Continuity and AirDrop features may not function correctly [for the time being](#) on macOS 12. [...]"
