

macOS und Windows auf der selben Festplatte

Beitrag von „ozw00d“ vom 3. November 2021, 09:24

A Partition layout without MSR (Microsoft System Reserved) isn't the correct way to install a windows machine. Microsoft suggest only windows installs with msr created. All other ways aren't supported by MS.

Yes it's possible but harder to maintain. If there are a necessary bootloader update by ms, the windows machine won't boot anymore.
