

macOS und Windows auf der selben Festplatte

Beitrag von „Sergey_Galan“ vom 3. November 2021, 22:18

If the section MSR is very necessary, it can be created in Windows.

We launch cmd from the administrator.

We enter commands:

diskpart

lis dis (we output the list of disks).

sel dis 0 (we select a disk).

creat par msr size=16 (we create the section MSR 16Mb)

lis vol (all are brought hard drive partitions).

exit (we quit diskpart).

The main thing in Mac OS it is necessary to create two sections, one 16Mb, another for Windows.

In Windows the section 16Mb needs to be deleted, and then to apply commands.

I managed.

```
sergey -- -bash -- 138x41
Last login: Wed Nov 3 22:52:06 on console
The default interactive shell is now zsh.
To update your account to use zsh, please run `chsh -s /bin/zsh`.
