Hello everyone

I have a Dell E6430

I have done installation of big sur through clover but it stuck at start up logo or black start up screen

I tried OC but I'm not sure i did it correctly since big sur disk image contains cover by itself

It's been for more than 2 weeks i followed every Youtuber but failed to have it done

Any one can help me to install big sur on my laptop!?

Please share any links which would be helpful

I have a corei5 with 8 gig ram
