

LoadImage failed - Unsupported & No Installer in Open Core Picker

Beitrag von „PizzaraGirl“ vom 15. November 2021, 17:45

[apfel-baum](#), sorry for not posting my specs, i am on a dell latitude 5590.

note that i am installing mac os monterey.

the keyboard layout has been edited by me im in germany! 🤪

edit: my mindate and minversion have been -1 before and it didnt work /:
