

# LoadImage failed - Unsupported & No Installer in Open Core Picker

Beitrag von „5T33Z0“ vom 19. November 2021, 13:17

[PizzaraGirl](#) Either you don't need these kexts (if the card is natively supported) or the kexts are in the wrong order. The correct order is shown below. But as you may know Apple re-wrote the whole Bluetooth stack for macOS Monterey, so the issue might be related that. Please consulte the coresponding Bluetooth under Monterey Thread to find out more:

[Sammelthread für BT Probleme unter Monterey](#)

	BundlePath	Comment	ExecutablePath	PlistPath	MinKernel	MaxKernel	Enabled	Arch
● 1	AirportItlwm.kext	intelWIFI	Contents/MacOS/AirportItlwm	Contents/Info.plist			<input checked="" type="checkbox"/> true	x86_64
● 2	IntelBluetoothInjector.kext	IntelBluetoothInjector	Contents/MacOS/IntelBluetoothInjector	Contents/Info.plist			<input checked="" type="checkbox"/> true	x86_64
● 3	IntelBluetoothFirmware.kext	IntelBluetoothFirmware	Contents/MacOS/IntelBluetoothFirmware	Contents/Info.plist			<input checked="" type="checkbox"/> true	x86_64
