

Problem with booting MacOs Monterey.

Beitrag von „oyku“ vom 9. Dezember 2021, 19:33

Thanks. So basically my laptop didn't wanted to boot from Usb but I've pressed F9 and got into boot selection, here I pressed pick from EFI file and picked flashdrive and tried both OpenCore.EFI and BOOTx64. Both booted to screen selector with windows and usb and both loaded. Yes it showed the kernel logs and apple logo and it booted but the problem is... Graphics are distorted. I've added attachments with pictures and logs.
