Problem with booting MacOs Monterey.

Beitrag von „oyku" vom 10. Dezember 2021, 10:28

5T33Z0 is securemodel in bios or config ? Also for graphic problem or stuck on loading?
If bios then I don't have advanced options for some reason.

[Hecatomb](#) I could try to watch on youtube position of the resolution settings inside macOs installer but I'll need to find some video where someone changes it.
