Problem with booting MacOs Monterey.

Beitrag von „oyku" vom 12. Dezember 2021, 13:57

Guys I need help. I've added AirportItlwm.kext to the kexts folder and added also in config, also few more ones. When I boot to the recovery I don't have wifi Icon and I can't connect and it's important to install files. How can I fix it? Btw brightness keys also don't work and ethernet I guess but idk tried from phone.
