1. Yes I have everything working. You give me your DSDT created in windows using ssdtime.exe and I will edit the cores and send you the patched DSDT. Also I will try to add the Audio Patch

2. I am only using SSDT-PM, SSDT-PLUG and SSDT-PMC for powermanagement and it works

Also I just upgraded to Monterey 12.1 without any issue.

That can't be better. Please find in the attachment my DSDT .

Please note that I'm using 2 CPU Xeon E5 2689 as mentioned above. Thank you so much in advance.
