

HP Elitedesk 800G2 Dual Monitor, aber wie bzw. was fehlt

Beitrag von „OSX-Einsteiger“ vom 15. Dezember 2021, 00:29

[MrWeb](#)

Ich war mal so frei habe deine EFI mal geupdatet deine hatte noch ein paar Fehler

```
OC Validate
OC: Missing key ResizeAppleGpuBars, context <Quirks>!
OC: Missing key Comment, context <Drivers>!
OC: Missing key ReconnectGraphicsConnect, context <Output>!
OC: Missing key UScale, context <Output>!
OC: Missing key EnableVme, context <Quirks>!
OC: Missing key ResizeGpuBars, context <Quirks>!
Serialisation returns 10 errors!

PlatformInfo-<Generic>-<SystemUUID> is borked (Can only be empty, special
string GUID or valid UUID)!
CheckPlatformInfo returns 1 error!

Completed validating /Users/stefan/Downloads/config-24.plist in 3 ms. Found
11 issues requiring attention.
