Hm it seems to get stuck there. I think I had waited for more than 5 minutes. I can give another try. I will try to disable those SSDT too.

1. Just use the DSDT and check. Also try 3 to 4 times sometimes it gets stuck

Also try resetting the nvram.

2. If only using DSDT doesn't work then remove DSDT and only use SSDT-PMC, SSDT-PLUG and SSDT-UNC.

3. If the above two doesn't work then let me know
