

OC DELL Latitude E6420

Beitrag von „Mo-6420“ vom 23. Dezember 2021, 09:08

Hi everyone,

First, sorry luluuu18 for the late

Second, use your usb macos to enable or disable [sip](#) apple from terminal install.

Sudo csrutil status

At the end, we are december 23rd 2021 and in my pic. The last OpenCore 0.7.7 and it works 100%

So merry christmas

And thank you very much
