1) Load default

2) 4G enabled

3) ERP enabled

4)Resize bar enabled

lore:

[fabio's Mac Pro.zip](#)

Opencore EFI:

[EFI MSI TRX40 PRO 077-2021-12-16.zip](#)

Pay Attention:

This EFI is calibrate perfectly for system summarised above!

Also identical system may have the need of some adjustment (MMIO whitelist section)

I use only Monterey 12.x System,

To have oldest one working you have to add only some kernel patches for it!

I can't describe anything that does not work here (Sleep,wake and so on are perfect)

I use this rig daily with Black Magic Davinci Resolve and Adobe Suite (ME,AE,PR,PS)

Have a nice day!
