

# Problems with AMD Install

Beitrag von „bvuiorgtfdsjnbs“ vom 1. Januar 2022, 14:03

@[OSX-Einsteiger](#)

I went to git hub, I already had the file you linked to me but anyway I downloaded the one you sent me and replaced it, I activated Kernel / Quirks ProvideCurrentCpuInfo true / Yes and tried three times with all three codes Kernel / Patch replacement but it didn't work.

if you want to edit the file and repost it I would be very grateful.
