

Problems with AMD Install

Beitrag von „bvuiorgtfdsjnbs“ vom 1. Januar 2022, 18:49

[OSX-Einsteiger](#) I have the last problem, I am on macos and I am booting without usb with mountEFI as it says in the guide but when I am on the terminal and I go to select the sd in which I have installed macos it does not find the EFI folder you know how I can solve
